

# Zadania do samodzielnej realizacji w domu (Moduł 1)

## Zadanie 1

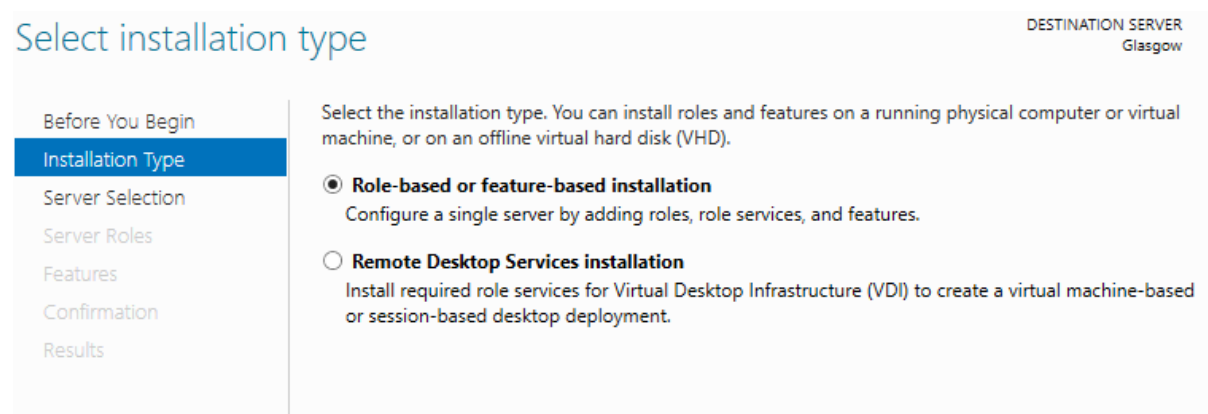

Zainstalować kontroler domeny (na systemie Windows Server "GLASGOW") opierający się na nazwie domenowej "{nazwisko}.local".

Podłączyć do utworzonej domeny system kliencki Windows 8/10.

Zalogować się w tym systemie na konto domenowe administratora.

Skonfigurować kliencki system Windows 8/10 tak, aby w jednej konsoli administracyjnej, dostępnej zawsze z poziomu pulpitu z wykorzystaniem pliku o nazwie "zarzadzanie\_domena\_{nazwisko}.local", był szybki dostęp do narzędzia potrzebnego do wykonania typowych zadań związanych z pracą z usługą Active Directory, tj. przystawki: "Użytkownicy i komputery usługi Active Directory".
